EDUCATION

B.Tech in Artificial Intelligence and Machine Learning **June 2023 – Present**
CSPIT - Charusat University, Gujarat, India

- Current GPA: 8.90 / 10.0

SKILLS

- **Languages:** Python, R, SQL, C, C++, Java
- **Frameworks:** Pandas, NumPy, Scikit-Learn, Matplotlib, FastAPI
- **Tools:** Power BI, Tableau, MySQL, n8n, Git/GitHub, Docker
- **Platforms:** VS Code, Google Colab, Kaggle
- **Soft Skills:** Excellent Communication, Teamwork, Problem-Solving, Creativity

WORK EXPERIENCE

Undergraduate Student Fellowship **July 2025 – March 2026**
CHARUSAT University

- Actively contributed to academic and development activities within the AIML Department.
- Apply team management skills and develop projects utilizing the MERN stack.

AI Engineer **May 2025 – Sep 2025**
Phaze AI

- Built and optimized large-scale web scraping pipelines using Selenium and BeautifulSoup for national eProcurement portals.
- Designed and deployed advanced n8n workflows integrating automation, data processing, PostgreSQL, and cloud systems.

Student Technical Coordinator **July 2024 – March 2025**
CHARUSAT University

- Served as a student tech coordinator in the AIML Department at CHARUSAT University.
- Managed various department projects and events, and mentored classmates.

PROJECTS

Resolve AI — Appliance Troubleshooting Assistant — [LINK](#) **September 2025**

- Developed a full-stack AI assistant for appliance troubleshooting using a RAG pipeline with NVIDIA NIM LLMs.
- Built a responsive Next.js frontend with TypeScript, featuring real-time chat, file uploads, and browser-based voice-to-voice interaction (STT/TTS).
- Engineered a FastAPI backend to manage document ingestion (PyPDF), create vector indexes (FAISS, SentenceTransformers), and handle stateful, guided conversations.
- Implemented a "Manual Mode" to constrain RAG context strictly to user-uploaded documents, ensuring precise and relevant answers.

Player Rating Analysis — [LINK](#) **Jan 2025 – Feb 2025**

- Used different machine learning models to predict a player's rating throughout a match.
- Conducted experiments using various regression algorithms like XGB, SVR, etc.
- Created a comprehensive dataset by scraping and combining data from multiple sources.
- Achieved an R-Squared Score of 0.70 by weighting features based on player position.

Smart Drone for Aerial Intelligence Applications **July 2024 – Dec 2024**

- Designed and built a quadcopter using Pixhawk and Raspberry Pi 4, enabling AI-based control.
- Secured funding of Rupees 1,00,000 for innovation and technical excellence from Icreate Funds.
- Explored use cases in agriculture, surveillance, and rescue operations.
- Led both hardware and software integration for the project.

CERTIFICATIONS

- **Getting Started with Deep Learning (NVIDIA) — [LINK](#)** **Dec 2023**
 - Learned fundamentals of deep learning, including CNNs and activation functions, and explored AI applications using NVIDIA tools.
- **Getting Started with AI on JETSON-NANO (NVIDIA) — [LINK](#)** **Feb 2024**
 - Gained hands-on experience with AI on edge devices, implementing image classification and object detection on the Jetson Nano.
- **Data Structure And Algorithms Using JAVA (NPTEL)** **Oct 2024**
 - Mastered core data structures and implemented algorithms in Java with a focus on time complexity and optimization.
- **Data Base Management System (NPTEL)** **Apr 2025**
 - Learned relational database fundamentals, including SQL, ER diagrams, and normalization, while practicing efficient database design.

ACHIEVEMENTS

Publications

- DemocraticNet: A Deep Learning Pipeline for Multi-Class Multi-Label Ministry News Classification successfully accepted, presented at the Ninth International Conference on ICTCS 2024.

Other Achievements

- Won the Odoo × Gujarat Vidyapith Hackathon, outperforming 900+ teams and 2,000+ participants from 15 states across India, awarded Rs. 45,000 cash prize.
- Selected among Top 200 teams out of 15,000+ teams and 40,000+ participants at AI Summit Buildathon by HCL GUVI; ranked 15th nationally in the final round with a score of 85/100.
- Secured selection among 800 teams chosen from 31,000+ applicants across India for the Meta x OpenEnv Hackathon; attended the offline round in Bengaluru.
- Secured two NPTEL Elite Certificates in DSA (using Java) and DBMS.
- Achieved **Pupil** rank on Codeforces, demonstrating strong problem-solving skills.
- Secured a Rs. 1,00,000 grant for developing an AI-based autonomous drone project.
- Leading the department's Robot Project as Project Head, securing a Rs. 1,00,000 grant for its development.
